Udyam Digital

Small businesses discover, buy and activate Accel Business in one sitting, on their phone, in their language

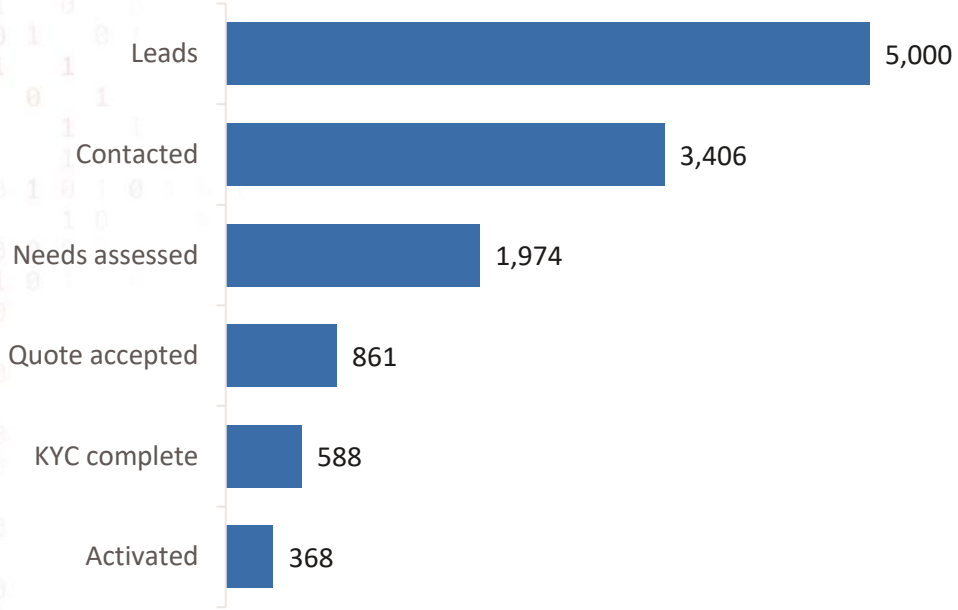

YTL Hackathon 2026 · Enterprise Track A · Business case

Platform Partner unstop

THE PROBLEM

Only 7.4% of leads activate; the quote is the biggest leak

Leads reaching each stage, Apr–Jun 2026. Needs assessed → quote accepted converts at just 44%.

17.6 days
lead to activation

3 calls
customer chases status

₹15,053
acquisition cost per activated SMB

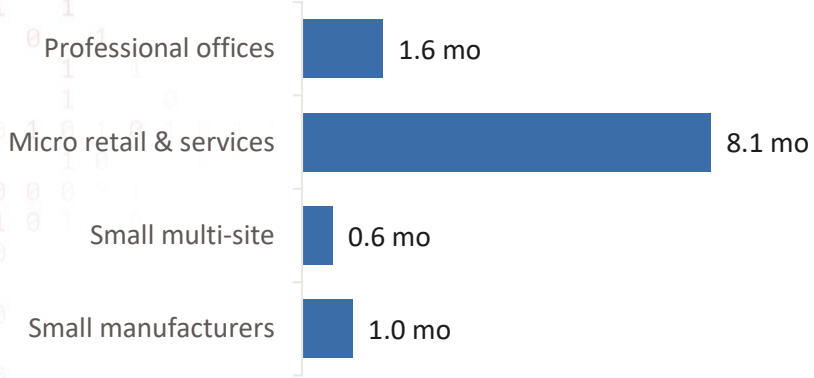

9.6% / 2%
activation with / without GSTIN

32% of all drops are caused by visits, slow or confusing quotes and paperwork, which a self-serve journey removes.

WHO FIRST

Lead with offices; win micro retail on low-cost channels

Months of revenue to repay acquisition cost

Segment	Share	Activ.	₹/mo	GSTIN	Churn	Wave
Professional offices	25%	11.1%	6,575	86%	13.8%	1 · digital
Micro retail & services	55%	4.1%	2,470	53%	22.7%	1 · digital + partner
Small multi-site	15%	11.0%	28,080	98%	10.8%	2 · hybrid
Small manufacturers	5%	12.8%	15,910	99%	8.1%	2 · field-led

Why: offices pay back acquisition cost in 1.6 months and 86% already have a GSTIN, so instant KYC works on day one. Micro retail is the volume (55%) but pays back in 8 months at today's ₹20k cost per activation, so it must come through WhatsApp, referral and partner-assisted journeys (₹4–6k).

BUNDLES & PRICING

Four bundles, one transparent monthly price each

Dukaan Digital

Kirana, salon, pharmacy

₹1,448/mo

Biz Fibre 100 + 1 business SIM

Add: POS & UPI billing ₹749, CCTV, guest Wi-Fi, WhatsApp*

12 mo · no GSTIN needed

Office Pro

Clinic, CA firm, coaching

₹5,254/mo

Fibre 300 + 2 postpaid lines + email, backup & security for 6 users

12 mo · ₹4,564 on 24 mo

Multi-site Connect

3–10 outlets

₹36,710/mo

Fibre + 4G failover + SD-WAN per site, POS, CCTV, 10 lines (5 sites)

Setup ₹63k or 6 EMIs

Factory Line

Units with 10+ staff

₹26,375/mo

Leased line 20 Mbps, managed firewall, machine IoT, email & security

GSTIN required

Pricing rule: price falls inside each catalogue range with commitment (12 mo = mid, 24 mo = floor). GST is always shown, setup can be paid in 6 EMIs, and the advisor trims optional add-ons to fit a stated budget. *WhatsApp, SMS and leased lines unlock once a GSTIN is added.

THE JOURNEY

One sitting: advise, quote, verify, sign, track

1. **Advisor**

   Chat or voice in 10+ languages; 6 questions; deterministic bundle with plain-language reasons

2. **Quote**

   One monthly price; toggle add-ons, quantities, 12/24 months; dependencies auto-added

3. **Smart KYC**

   DPDP consent, photo upload with extraction, live GSTIN/Udyam lookup, 15+ automatic checks

4. **e-Sign & track**

   OTP e-sign, install slot, live tracker and WhatsApp updates instead of calls

Hindi advisor

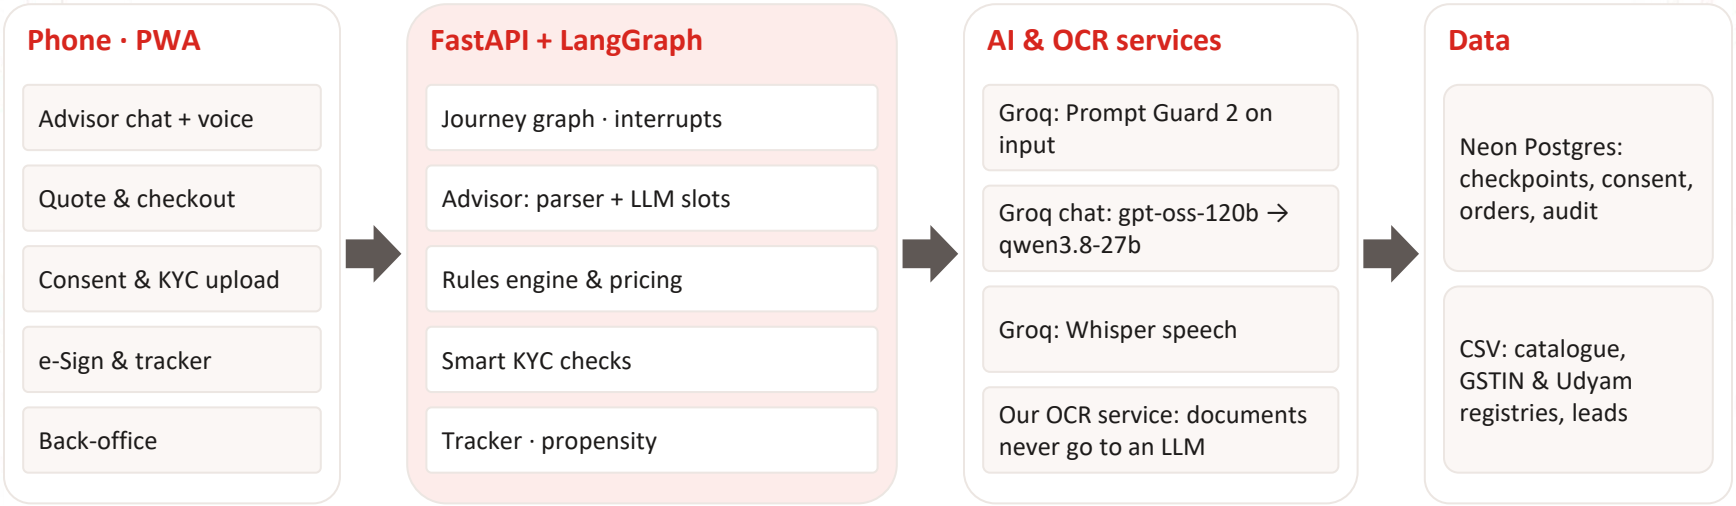

Live quote

KYC issues explained

ARCHITECTURE

The LLM talks; deterministic code decides prices

LLM talks, code decides
the LLM fills slots and explains; products and prices come from the catalogue rules

Model rotation
a rate-limited model is parked until its reset; the next model answers

Always works
regex parser, scripted advisor and local OCR run with no API key

Guarded
Prompt Guard screens input; PII is redacted before any LLM call

SMART KYC & PRIVACY

Smart KYC catches the planted problems and keeps no images

K01	**Blocked**	GSTIN cancelled in registry; Udyam number blank
K04	**Retake**	GST certificate photo too blurry to read
K06	**Fix**	GSTIN check digit wrong: altered number
K07	**Blocked**	Legal name differs from GST registry
K11	**Fix**	Bill 257 days old; 'Owner' can't sign for a Pvt Ltd
K05	**Fix**	Udyam-registered but no certificate; 'Owner' can't sign for an LLP
K10	**Fix**	'Owner' isn't a signing role for an LLP
K02, K03, K08, K09, K12	**Verified**	incl. skewed scan and O/0 OCR auto-repair

Offline result on all 12 specimen applicants (scripts/kyc_batch.py), no LLM needed.

Consent by purpose

verify · activate · marketing (opt-in), versioned ledger, withdraw anytime

Minimise

our own OCR reads images in memory, never an AI company; only fields + SHA-256 kept

Mask & redact

GSTIN/ID masked in UI and logs; PII stripped before LLM calls

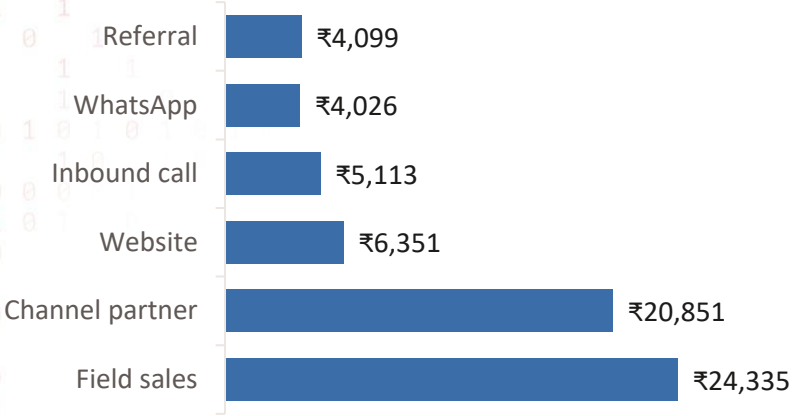

Retain & purge

pending KYC 30 days, abandoned journeys 90 days, audit log of every action

FIELD FORCE & PARTNERS

Digital adds to field sales and partners instead of competing

Cost per activation by lead source

Every lead keeps its source and partner code for 90 days, so the partner who brought it is paid even if the owner finishes alone.

Owner, self-serve

Micro & offices with GSTIN: WhatsApp, QR and web links open the advisor directly

Partner-assisted

Partner runs the same journey on the owner's phone with a partner code: earns commission, helps with GST, documents and install

Field sales

Multi-site and manufacturers, plus back-office leads ranked by propensity (AUC 0.72) with a next best action

MEASURING SUCCESS

Five metrics, with targets for the first digital cohort

Metric	Today	Target	Why it moves
Lead → activation	7.4%	**15%**	instant, plain quote fixes 385 'too slow / too complex' drops
Days to activate	17.6	**≤ 6**	KYC in minutes; fibre installs in 5 days
Cost per activation	₹15,053	**≤ ₹6,000**	digital sources cost ₹4–6k vs ₹24k field
Status calls / customer	3.0	**≤ 0.5**	tracker + WhatsApp updates
6-month churn	15.2%	**≤ 10%**	churn is 6% at 1 follow-up vs 28% at 5

Per quarter of 5,000 leads

+382

activations (368 → 750)

≈ ₹3.2 cr

added annual revenue at ₹6,900 median/mo

₹10 L

less acquisition spend

Targets are set for 6 months after launch in pilot cities, measured on leads that start in the digital journey vs the field-led baseline.

ROLLOUT & RISKS

Pilot in four cities, scale in nine months

1

Months 0–2 · Pilot

Pune, Bengaluru, Jaipur, Lucknow. Offices + GST micro retail. Web and WhatsApp links, 50 partners

2

Months 3–5 · Expand

10 languages with voice, all channel partners onboarded, live DigiLocker and e-sign

3

Months 6–9 · Scale

All tier-1/2 cities; hybrid flow for multi-site and manufacturers; fine-tune a small Indic model on consented chats

Risk → mitigation

Wrong advice: rules engine decides; 18 scenario tests; human hand-off

Forged documents: registry, checksum, cross-document and blur checks on every upload

Channel conflict: partner attribution and commission on assisted journeys

Install capacity: slot booking; 5G AirFiber in 2 days where fibre is late

Price-sensitive micro: 24-month price, starter bundle, setup in EMIs
